

Varec, a wholly owned subsidiary of Leidos, is considered the pioneer for inventory tank gauging instrumentation and has been leading the innovation around fuel and bulk liquid management solutions for the past 90 years. Today, the Varec team is nearly 200 employees strong and is comprised of product development, manufacturing, sales and business development, customer service, systems integration, deployment, and program management, as well as all business support functions.

Mission Statement

To develop solutions that help companies increase visibility, improve automation, and provide reliable measurement and control of bulk liquid assets anywhere in the world.

Milestones

Products

- FuelsManager®
- Communication Interfaces
- Data Capture Units
- Float and Tape Gauges
- Operator Interface Terminals
- Radar Gauges
- Servo Gauges
- Temperature Probes
- Transmitters

Market Solutions

- Defense Fuel Management
- Aviation Fuel Management
- Bulk Liquid Inventory Management
- FOD Detection
- SCADA
- Tactical Liquid Storage
- Termination Automation

Services

- Configuration Management
- Environmental Programs
- Field Service and Training
- Life Cycle Sustainment
- Program and Project Management
- Systems Engineering
- Technical Support Plans
- Training Programs
