

The rugged 9760 Tactical Mobile Computer (TMC), operating FuelsManager® software, provides the local fuel farm operator real-time inventory data to manage, account for and report on their current fuel stocks and transactional fuel movements (receipts and issues) on a daily basis and then transfer this data to FuelsManager enterprise systems.

9760 Tactical Mobile Computer

Pre-configured computer with software that tracks fuel data.

Reliable and Repeatable Automated Inventory Management

A component of the TacFuels® solution, the 9760 TMC displays the inventory and measurement data collected by the 7660 Tactical Fuel Gauge (TFG) and 8240 Tactical Data Unit (TDU). It runs the FuelsManager® Inventory Management and Accounting applications to help operators manage their local fuel assets. TacFuels helps improve the accountability process of tactical or expeditionary fuel points through automation to reduce the errors associated with manual data entry processes. The complete solution becomes a reliable method to baseline inventory and track fuel movements for better asset visibility and operational control locally and at the enterprise.

Key Benefits

- Integral part of the Varec TacFuels® system solution
- Rugged design makes it suitable for harsh environments
- Simple plug and play desktop installation
- Approved for normal locations

9760 Tactical Mobile Computer

Preconfigured computer with software that tracks fuel.

System Configuration Options

Quick Specs

Processor:

7th Gen Intel® Core™ i3-7130U Processor
(Dual Core, 3M Cache, 2.7GHz, 15W)

Operating System:

Windows 10 Pro 64bit English, French, Spanish

Memory:

Standard - 8GB, 2x4GB, 2400MHz DDR4
Non-ECC

Hard Drive:

Standard - 2.5" 500GB 7200RPM SATA Hard Drive

Display:

14" FHD WVA (1920 x 1080) Anti-Glare
Non-Touch, Camera with Privacy Shutter & Microphone

Wireless:

Qualcomm® QCA61x4A 802.11ac Dual Band
(2x2) Wireless Adapter+ Bluetooth 4.2

Power Supply:

90W Rugged AC Adapter, 7.4mm Elbow Barrel

Primary Battery:

3 Cell 51Whr ExpressCharge Capable Battery

The four collapsible storage tank diagram represents the standard and most common configuration. The TacFuels solution can support up to 28 tanks in one system.
