

Additive Profiles Report

This document provides information on the Additive Profiles Report, which is a standard report available in FuelsManager.

Prerequisites: The Additive Profiles report should have been preconfigured for your Site, and your User account should belong to a User Group that has been assigned to view the report. See the *Report Assignment Configuration* help page for more information.

Additive Profiles include one or more additives, which are compounds that enhance the properties of a base fluid. Some examples of additives are corrosion inhibitors, engine cleaners, anti-knocks, and so on, which are added to fuel to improve performance.

The Additive Profiles Report allows you to view the additive profiles configured in FuelsManager for all or a particular Site(s)/Site Group(s).

For more information on configuring Additive Profiles, refer to the *Additive Profiles Configuration* help page.

Profile ID	Product ID	Rate	Cycle Volume	Tolerance	Treat Rate
000001	99001	10	40	5	1.056688149
	99001	14	44	0	0.830254974
	99001	12	44	0	0.968630803
	99002	11	43	0	1.032672509

Printing Time: 6/20/2022 2:47:29 PM Version: 12.0.0.0 Page 1 of 2

You must belong to a FuelsManager user group with appropriate security access rights to view and modify data. Some pages may not be available for entry or edit depending on your user security rights.

Viewing the Additive Profiles Report

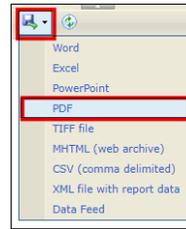

You may view the Additive Profiles Report from the Reports menu. Follow the steps below:

- 1) Log in to a **Site** or **Site Group** in FuelsManager.
- 2) From the menu, select **Reports > Operations > Additive Profiles Report**. The report displays.
- 3) Select the appropriate **Site Group**, **Site**, or **multi-Sites** to filter the data.
- 4) Click **View Report**. The report values are refreshed based on your selections.

Printing the Report

You may print the report from the header. Follow these steps:

- 1) Click the **Export**  dropdown menu.
- 2) Select **PDF** from the list and then save the file in your desired folder location.
Varec recommends to use the PDF format for exporting reports.
- 3) Open the **PDF** file and then **print** the report.

Report Header Field Descriptions

Field	Description
Site	Filters the table to only show data for the selected Site Group(s), Site(s), or all.
View Report	Click to view the report based on the selected criteria.

Report Column Descriptions

Field	Description
Profile ID	Lists the IDs that identify the additive profiles.
Product ID	Lists the IDs that identify the products.
Rate	Lists the rate or amount of product per injection cycle. <i>This is typically measured in gallons. The amount of additive injected into the product depends on the Cycle Volume (below).</i>
Cycle Volume	Lists the amount of additive injected into a product per injection cycle. <i>This is typically measured in cubic centimeters (cc).</i> Example: Rate = 100, Cycle Volume = 25 <i>For every 100 gallons of product, 25 cc of additive is injected.</i>
Tolerance	Lists the maximum out of tolerance value allowed for the total amount of additive injected into a product. Calculation to determine out of Tolerance: Actual additive rate - Treat Rate
Treat Rate	Lists the ratio of additive per load. Calculation: Cycle Volume / Rate
